I Introduction & System Requirements

This distribution is the Lizardtech Express Cartridge Manager (ECM) - Server.

An ECM is required for operation of most LizardTech image encoding applications.

It provides access to data cartridges which are consumed by the applications.

This distribution is part of the larger GeoExpress package.

This product is supported on the following platforms

Windows

2000, XP, 2003, Vista and 7 (32 bit and 64 bit)

Solaris / Sparc V9

Solaris 8, 9, 10

Linux

RHEL 4, 5, 6 (both 32 bit and 64 bit)

II Installing Express Cartridge Manager

To install Express Cartridge Manager on Windows:

1. Run (double click) the "Setup.exe" executable which is part of this Express Cartridge Manager distribution. Alternatively, you can select this option from the Geo Express CD Browser application "launch.exe" / Install Products / Express Cartridge Manager.

2. Follow the instructions to install Express Cartridge Manager.

To install Express Cartridge Manager on Solaris and Linux:

- 1. Open the Express Cartridge Manager folder on the product CD.
- 2. Run the install.sh file to begin the installation process.
The installer script places the files in /usr/local/LizardTech/ECM by default. The Express Cartridge Manager must be installed on a local drive.
- 3. Set the environment variable LT_UMDB_PATH to /<install path>/db.

III Using the Express Cartridge Manager

The Express Cartridge Manager is integrated into your LizardTech Software encoding products. For specific instructions including how to obtain the Express Cartridge that is included with your product, and how to add that cartridge to the ECM, please consult the documentation for that product.

Very briefly, your cartridge comes in an ".ltc" file which you can obtain here:

<http://www.lizardtech.com/support/activation>

To add the cartridge to your ECM do this:

"Open" the file or double click it. (Windows only) OR
umadmin -add <path to the .ltc file> (all platforms)

IV Release Notes

Release: 1.0.0.10 Date: October 2011
Fixed memory leak (server); Sync with GeoExpress 8.5

Release: 1.0.0.9 Date: October 2010
Tested with Windows 7; Sync with GeoExpress 8.

Release: 1.0.0.8 Date: January 2008
Added support for 64 bit OSs.

Release: 1.0.0.7 Date: 01-AUG-2002
This is the first release of the Express Cartridge Manager.

V Reporting Problems
